

Cisco Huddle Space Solutions

Meet the devices that help you reimagine your workplace

Cisco Room Phone

This conference phone is designed for collaborative meetings and is easy to use. Immersive HD audio, proximity with wireless sharing, and an active speaker provide a great call, meeting, and sharing experience.

Cisco Room USB

Wireless content sharing, intelligent video and premium audio for the ultimate BYOD meeting experience. Turn your laptop into an immersive studio via USB and connect with any meeting service provider with ease.

Cisco Room Bar

Room Bar is a codec-powered video appliance ideal for high-quality video collaboration. Use it to bring people together with exceptional video, crisp audio and rich content when they cannot be in the same room. Connect it with up to two screens for the ultimate hybrid work experience, either on RoomOS or Microsoft Teams Rooms (coming soon).

Cisco Board Pro 55

Use the ultimate room device for hybrid teamwork, featuring a 55-inch touch screen, built-in camera, speakers and microphones, and flexible mounting options. Join video meetings on any platform, share content, whiteboard and ideate, and access your go-to productivity tools via third-party web apps - all in a seamless, integrated workflow.

Benefits

- Maximize productivity with collaboration devices that works in harmony with any space and use case
- Improve flexibility by empowering both onsite and remote workers with tools that allow them to easily stay in touch with their distributed team
- Bring intelligence to your smallest spaces, with enterprise-grade technology typical of larger rooms
- Ease setup and management and get richer insight into your workplace through Control Hub

Drive collaboration by making your huddles comfortable and inspiring

Help teams adapt to the new way of working. Cisco devices for huddle spaces help bridge the physical and virtual, eliminating the feeling of distance when you can't meet in-person. Work where you want, when you want, and how you want.

Webex huddle space devices help you:

- **Stay ahead.** Accelerate workplace transformation by implementing intelligent technologies to enable seamless workspaces, flexible workstyles, and intuitive workflows.
- **Save time.** Cisco huddle devices are so easy to use that employees can use them without having to ask an IT specialist for help.
- **Optimize your space usage.** Build alerts based on capacity, track space occupancy, display custom content via digital signage, and even create triggers to inform about cleaning after a room is used
- **Reduce costs and complexity.** With easy management and support, you can equip thousands of rooms and reduce your total cost of ownership.

Interacting in high fidelity is critical to productivity. Whether meeting virtually or at the office, you need a fatigue-free, life-like collaboration experience.
